

LANDBELL GROUP

LANDBELL GROUP is an international supplier of service and consulting solutions for environmental and chemical compliance. We have 25,000 customers in over 30 countries and are present on four continents. We employ over 250 people worldwide. It is our aim to reduce the complexity of extended producer responsibility legislation, as well as product- and packaging-related requirements for producers and distributors. In everything we do, we seek to provide our customers with the most competitive solutions – in terms of service quality, compliance and cost.

WE ARE CURRENTLY SEEKING TO FILL THE FOLLOWING POSITION

SPECIALIST RECYCLING TECHNOLOGIES (m/w/d)

FULLTIME // LOCATED IN MAINZ

As a Specialist Recycling Technologies, you will monitor and assess sorting/recycling technologies and consult internal and external stakeholders on projects and regulations.

YOUR DUTIES WILL INCLUDE

- // Monitor, document and evaluate in cooperation with Landbell sourcing team and external partners:
 - globally existing and upcoming sorting technologies and recycling technologies (mechanical / chemical) for products and packaging creating strong and well- documented technological knowledge
 - new material developments such as compound materials and bioplastics
 - related legal requirements (e.g. treatment requirements, recycling efficiencies, waste shipment)
- // Review and analyse identified technologies on its applicability in local markets (globally) and identify suitable sorting and recycling technologies for new materials, in terms of technical, environmental and economic performance and potential business cases
- // Identify, establish contacts to new technology partners focusing on plastics recycling and maintain contacts with new and existing partners (also in cooperation with Landbell sourcing team)
- // Consult Landbell leadership team strategically and support the Landbell sales as well as the business exploration teams with technological input
- // Advocate policy makers globally with well-based technological knowledge for better circular economy frameworks supporting the Head of Market Intelligence & Governmental Affairs

- // Manage and run R&D projects (publicly / internally funded) directly or supporting other Landbell teams with recycling technology related input

THE IDEAL CANDIDATE

- // A degree in materials science, chemistry, environmental science or a related topic
- // Sound knowledge in plastics engineering incl. processing, design, development, and manufacture of plastics products and packaging
- // Ideally professional experience in plastics recycling technologies
- // Self-managed, engaged and careful working style with at least two years of experience in project management
- // Very good communication skills for an appropriate external stakeholder dialogue
- // High level of spoken and written English and German
- // Readiness for occasional national and international business trips

REWARDS

- // Multicultural and fast-growing environment
- // Flat hierarchies with short decision-making paths
- // Competitive salary
- // Contribution to circular economy projects
- // Great international working atmosphere in a motivated team

Qualified candidates should send a CV and cover letter to:
