

MEET THE KNOWLEDGE DATABASE: EPR MADE EASY

Access to regulatory changes in a few clicks

More and more countries are implementing extended producer responsibility (EPR) to tackle their waste and resource problems. Tracking all resulting obligations for each jurisdiction is a time and resource intensive task.

The Knowledge Database (KDB) offers unlimited access to information on core producer requirements resulting from EPR-type legislation. It is for companies placing electronic goods and/or batteries and/or packaging onto markets globally.

Regulatory tracking service

The KDB tracks laws, regulations and essential information on EPR globally. It provides:

- general analysis of EPR obligations per country and waste stream
- a focus on legally binding requirements for producers including mandatory design requirements or markings
- information on national registration and reporting to national authorities
- a list of all EPR related legislation per country and waste stream

Customer benefits

Subscription to the KDB gives customers permanent access to global information on EPR. Customers can also choose the waste streams and regions that they want to track.

Access to the KDB:

- frees up customer resources and time – no more need for internal research
- enables manufacturers and distributors to understand their obligations
- shows with certainty and at a glance what exactly to consider in which country
- offers the possibility to produce a legal register and reports comparing the legal requirements in different countries
- provides an overview of recent changes of requirements

Expertise

Landbell Group has an international network of compliance experts who research EPR requirements and develop solutions to meet customers' needs.

As a global producer responsibility organisation, Landbell Group carries out EPR operations in many countries every day.

The KDB is maintained by a team of experts who monitor EPR regulations globally.

About us

Landbell Group is a leading global supplier of environmental and chemical compliance services, which helps companies to carry out their extended producer responsibility (EPR) obligations.

With customers in many countries, and colleagues based all over the world, we are a global platform for EPR.

Our unique approach

- An international team and network of compliance experts combine unrivalled operational expertise with consulting competence
- We run more approved EPR schemes than any other organization globally
- We offer international support for EPR and chemical regulations, as well as software solutions for efficient compliance management processes
- Our global takeback programmes collect products anywhere

Our service areas

- Environmental compliance
- Chemical compliance
- Product takeback
